Subject: Sediment Trap Design

Davis,

As discussed during our technical call earlier today, the sediment trap design and construction has been modified to reflect recommendations by Dale Norton of Washington State Dept of Ecology (original designer) and the latest trap design installed by AnchorQEA for the Portland RI/FS. See attachments.

- New Figure 3 series (will replace Figure 3 of the PDI surface water and sediment trap FSP)
- Addendum B-6 - will be added to Appendix B of the surface water and sediment trap FSP, it includes a description of the design modifications

These have been constructed and will be mobilized to the site next week.

Also, we are checking the FSP and QAPP for the other items discussed on our call today (location of lab, shipping to Canada, bottle preservative etc).
